

Is it New Bus time? You Decide....

The Problem

"Time is starting to work against our bus. At 35 years old, it's getting more difficult to find parts. Some parts are either not readily available or not available. When we are on the road, any downtime can cause severe difficulties in our ability to minister. It is important to take steps to prevent downtime difficulties. In addition, the cost has become a factor. Last year, parts alone cost the ministry \$10,000 - and we did all the service work. (Actual costs would be closer to \$20,000.00 if I weren't a mechanic as well as evangelist)

What to Do?

In view of the situation, we believe God is directing us to take steps to replace our bus with something newer. New buses of this type range in price from \$450,000 to \$1.3 million US dollars. These seem far too expensive. There is a 1991 bus (only 15 years old) available for only \$155,000.

The Challenge!

The challenge is how to replace the old bus with sufficient funds for the new one. We thought if 1500 partners might be inspired to donate or pledge \$100.00 in the next 12 months to take a small part in replacing our "Home on the Road", we could achieve this transition as soon as possible.

Praise!!

Our old bus has exceeded all expectations. The expected useful life is 1.5 - 2 million miles and only 20 years of service. It has surpassed its useful life by 15 years and is near 2,000,000 miles. This still seems amazing. The Lord has kept us safe and provided reliable transportation for this time and this distance. We are thankful.

We hope and pray you will stand with us. Please write to the ministry if you can help by committing to this effort."
